

**NEW!**

**Renold BTL Series**  
Bridge Scraper Drives

Free, no obligation,  
site inspection

**RENOLD** | Gears

## The new Renold BTL gearbox has been designed specifically for travelling bridges with the benefit of being a drop-in replacement.

Powered by a double reduction worm gearbox they are ideal for the low speeds required to drive the bridges.

The BTL Series is readily available for a quick replacement solution, ensuring minimum downtime and disruption.

- Close grain cast iron gear case for strength in arduous conditions
- High capacity cylindrical roller bearings on the drive shaft to handle overhung loads
- Double reduction, high quality worm gearing for smooth operation and long life
- Fitted with filton breathers and benefitting from an epoxy paint finish to ensure a weather proof unit

- Drop-in design reducing the need for costly modifications
- Available from stock, reducing downtime
- Long service life, increasing maintenance intervals
